REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious a method of forming an interferometer film for an interferometer sensor including the step of forming a polymer layer of substantially uniform thickness directly on an interferometer substrate, the layer forming the interferometer film, wherein the polymer layer is deposited by polymerisation of a gas of monomer particles including a para-xylylene in combination with the rest of claim 1.

The prior art, either alone or in combination, does not disclose or render obvious an interferometer sensor comprising an interferometer substrate and a parylene polymer film of substantially uniform thickness, in which the parylene film is formed directly on the interferometer substrate, a partially reflective surface being defined at the interface between the parylene film and the substrate in combination with the rest of claim 7 for the reasons argued by applicant in the Remarks in the Amendment filed on 5/27/04.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
